## Abstract

This individual report demonstrates how graduates of our program are qualified to work for Nepal's largest technological company. This investigates what the Deerwalk company needs from a technology company. This report examines the company from a variety of perspectives and explains how graduates of our course might find employment in that industry. This report looks at how our graduates are capable and knowledgeable, including their knowledge of java, swift, and python, leadership skills, competent written and oral speech, and knowledge of source systems. Keywords: Graduates with Python, C++, and leadership abilities from Deerwalk

Data storage, population and health management, Deerwalk plan analysis and reports, and numerous other topics It is a private business with headquarters is in Lexington, MA. It employs over three hundred people worldwide and has a technology campus in Kathmandu, Nepal. With over one hundred professionals and team members working together.

### 1.2 University of Wolverhampton

*Figure 1 University of Wolverhampton*

One of the best modern universities is the University of Wolverhampton. It is a public university with four campuses in Staffordshire, Shropshire, and the West Midlands. It is one of the UK's biggest universities. It was founded in 1827. There are three faculties at this university: the Faculty of Education, the Faculty of Health and Wellbeing, and the Faculty of Arts and Science. Over 23,000 students attend it, choosing Wolverhampton because of its cutting-edge technology.

In the list of "Best Global Universities," Wolverhampton University comes in at number 1526, 543 ranked in Europe's "Best Global Universities" list, and 90 in the UK's "Best Global Universities" list.

### 1.3 Herald College Kathmandu

*Figure 2 Herald College Kathmandu*

Herald College Kathmandu (HCK) offers the most cost-effective UK university education. In close cooperation with the University of Wolverhampton in the United Kingdom, it offers bachelor's degrees in IT and business. The programs offered by Herald College Kathmandu are adaptable and have always aimed to broaden knowledge.

## **2. Body**

### **2.1 Deerwalk**

Deerwalk, Inc. is a software development and consulting company. This company specializes in the development of healthcare software, population health management, analytics platforms and care coordination. Its products and services are primarily focused on improving the efficiency and effectiveness of healthcare organizations. They provide them with the tools they need to analyze, manage and improve their operations. Technological changes and their associated impacts on businesses have necessitated a discussion on the contents of the undergraduate accounting degree curriculum (Sithole, S., 2015). It also provides custom software development, data integration, and consulting services to clients in the healthcare, finance, and education sectors. The company's clients include healthcare providers, payers, and life sciences organizations. It provides custom software development, data integration, and consulting services to clients in the healthcare, finance and education sectors.

### **2.2 University of Wolverhampton**

The University of Wolverhampton was established in 1851 as a Mechanics' Institute and has since grown to become a large one. This University is offering a wide range of undergraduate and postgraduate programs in areas such as arts, education, engineering, health and social sciences. It is home to several research centers and institutes, which focus on various aspects of scholarly inquiry. The university also offers continuing

professional development courses, online and distance learning options, and research opportunities.

The University of Wolverhampton offers a wide range of modules as part of its undergraduate and postgraduate programs. These modules are designed to provide students with depth knowledge and skills in a specific area of study. Some examples of the types of modules that may be offered at the University of Wolverhampton are Core modules, Elective modules, Research modules. It should be noted that specific modules offered varies by degree program and level of study and can change over time.

The University of Wolverhampton is in the city of Wolverhampton in the West Midlands region of England. It is around 156km northwest of London and 32km west of Birmingham. Wolverhampton is well-connected by road and rail, and there are regular bus and train services to and from the city. The university has modern and well-equipped facilities, such as classrooms, lecture theaters, computer labs, libraries, and research centers.

## **2.2 Herald College Kathmandu**

There are Different type of class lecture, Tutorial, Workshop and it is different with our traditional method of Education System. Herald gives us quality education with incredible teacher with peaceful environment. It is a college where we can be exposed to outer world and in competitive environment. It is the best college providing a British degree here in Nepal. It is affiliated with foreign university which is great to complete in international market. The college helps to create new knowledge and innovative solutions in fields such as engineering, information technology, management and business. It is private institutions which can be important for the professional development of the faculty and students, as well as for the reputation and visibility of the college. It also can help to establish partnerships and collaborations with other organizations and institutions, both within Nepal and internationally. IT is affiliated with Wolverhampton University.

## **3. Nepali University vs Foreign University**

### **3.1 Nepali University**

Nepal's Nepali Universities are higher education establishments. They offer science, engineering, medicine, law, business, and humanities-related undergraduate and graduate programs. Although the curriculum and teaching methods may differ from those of foreign universities, all are managed and controlled by the Nepali government. In addition, academic standards are upheld, and academic research is conducted at Nepali universities. The entrance examination and, in rare instances, the students' grade point average are used in Nepal's university admissions process. Students in need can also receive financial aid and scholarships from Nepali universities.

### **3.2 Foreign university**

A "foreign university" is a college or university located outside of a person's home country." Like Nepali universities, these universities offer undergraduate and graduate programs in a variety of fields. They might be known for areas of expertise and have distinct curricula and teaching methods. Because they typically attract students from all over the world, they also typically have a more diverse student body. The academic standing, research facilities and opportunities, and faculty quality of many foreign universities are well-known. In foreign universities, the admissions process is frequently more selective and may involve standardized test scores, essays, and interviews. Although the cost of living and tuition may be higher than at Nepalese universities, numerous foreign universities offer scholarships and financial aid to international students.

## **4.Critical analysis**

Our course Graduates are suitable for Deerwalk companies because they have received a strong educational foundation in the field, including knowledge of the latest technologies and industry trends. They also have a natural curiosity and willingness to learn, which is essential for adapting to the constantly evolving technology landscape. Additionally, graduates are typically able to think critically and solve problems, which are important skills for any technology-related role. Furthermore, graduates are often able to bring fresh

perspectives and new ideas to the table, which can be valuable for a Deerwalk company looking to stay ahead of the curve in an ever-changing technology.

## **5. Future relationship**

The relationship between IT graduates and Deerwalk companies is likely to continue to evolve in the future. As technology advances, the skills and knowledge required for various roles within these companies will likely change. Graduates will need to stay current with these developments in order to remain competitive in the job market. Deer Walk Company will need to provide opportunities for continued learning and skill development for recruit graduates in order to stay ahead of the curve.

Additionally, the relationship between IT graduates and Deerwalk company is likely to become increasingly collaborative, with companies reaching out to universities and other educational institutions to help shape the curriculum and ensure that graduates are well-prepared for the workforce. This will help to ensure that the skills and knowledge of graduates align with the needs of companies, and that there is a strong pipeline of talent for the technology industry.

Overall, the relationship between our course graduates and Deerwalk companies will likely continue to be a symbiotic one, with both parties relying on each other to drive innovation and progress in the field.

## **6.CONCLUSION**

I came to the conclusion that the Deerwalk company's needs and business goals are met by the graduates of our information and technology course.

If our graduates possess the necessary technological and data analysis knowledge and expertise, programming can make them strong candidates. Our program's graduates also

have traits like adaptability, the ability to work in teams, and the ability to solve problems. The graduates will be skilled in software development because it is one of the requirements for some students in their final year. I think that our training gives you a complete understanding of the database and computer system. They will be able to get along with the people working for the company.

I came to the conclusion that the Deerwalk organization is a major one with significant investments in technology after examining the aspects of both the course and the company.

The course graduates are employable in every way. Additionally, based on the company's requirements, Wolverhampton graduates could be targeted by Deerwalk for the hiring process. This is because, as a result of the extensive research I carried out, we have concluded that Wolverhampton University graduates can be employed by the Deerwalk company as well as the majority of technological businesses.
