

Name: - Nabodip Thapa

Coding challenge 3

Question Answer

What are the most challenging aspect of the coursework task?

Ans:- The course assignment was a bit difficult because it counted for 40% of the module mark. It supports the conceptual growth of Python programming. We were assigned the task to see how much we understood about the Python programming language. It addressed every broad concept we had discovered so far in the course regarding the Python programming language. We can be sure we have a thorough comprehension of the course if we can successfully complete the challenge. All of the ideas covered in our course are included in the coding challenge. I've become more confident in the Python language because to the challenges of making the noughts and crosses.

How did you go about completing the task?

Ans: - For the evaluation, we had to develop a tic tac toe game using Python, which caused some difficulties. where a software is written to run the game and keep score for the leaderboard. I have a lot more knowledge regarding the curriculum now that I have finished this task. With the help of my professors and the Internet, I was able to finish the assigned readings and essays.

What have you learned over the course of completing this coursework task?

Ans: - As I do the work at hand, I keep the big picture in mind. I am proficient in using and understanding the Python programming language. I'm able to gain a better grasp of Python programming thanks to the current assignment. It gives me more faith in the knowledge I've already gained about the course topic. The challenge was a great way for me to learn more about Python programming.
